```

```
        "My greatest strength is in being able to creatively analyse a situation and be able to pull together resources and technologies from perhaps disparate or 'out-of-the-box' places, through an understanding of how they can mesh together and the advantages (or disadvantages) of one implementation over another - and enough knowledge and experience to be able to roll up the sleeves and problem-solve when necessity dictates. I often use many of the above technologies myself for my own personal projects, in my spare time, as I am truly excited by many innovations which they have produced.";

Experience[] = (

Dates[] => (start => "Jan 2013", end => "Nov 2014"),

Company => "Mehmetech Pty Ltd",

Roles[] => (Senior Developer, Webmaster, Systems Administrator, Database Manager, Lead Designer),

Description => "Lead front and back end developer, working with front end design team on eLEDGER product. Manager of both production and development servers, including database design, security and administration of internal/external access - including management of customer data, the billing and payments system, as well as email and cloud-based collaboration tools. Management of Sales and Support enquiries, including maintenance of customer self-help knowledgebase and associated tutorial system. Most recently expanded into mobile app development using both Apple and Android IDEs to bring fully integrated products into both iTunes and Google Play app stores, complementing the existing mobile device integration of the web UI.",

Technologies[] =>

(HTML5, CSS3, AJAX, JSON, Java, Javascript, LAMP stack, SSL, bash, ssh, cron, mailer daemon, PEAR/Imagemagick/fPDF, oauth including Google, Outlook, Yahoo APIs, Xcode, Android Studio, git, Wordpress, GIMP, Libre Office)

);

Experience[] += (

Dates[] => (start => "Feb 2009", end => ""),

Company => "Mic Mehmet Computer Services Pty Ltd",

Roles[] => (PHP Developer, Systems Administrator, I.T. Consultant),

Description => "Systems design and troubleshooting for SME customers, with particular emphasis on (front end) multi-platform compatibility and accessibility, as well as (back end) process work flow. Working at times as part of dev team and sometimes solo.",

Technologies[] =>

(HTML4, CSS3, AJAX, XML, SOAP, JSON, Javascript, LAMP stack, IIS, SSL, bash, ssh, Photoshop/GIMP, MS Office, Exchange, Zend, CodeIgniter, git, cpanel)
