Summary

My greatest strength is in being able to creatively analyse a situation and be able to pull together resources and technologies from perhaps disparate or 'out-of-the-box' places, through an understanding of how they can mesh together. This means a deeper understanding of the advantages (or disadvantages) of one implementation over another and enough knowledge and experience to be able to roll up the sleeves and problem-solve when necessity dictates.

Education

2014	Startup Leadership Program	Fellowship
2000	Macarthur Business Enterprise Centre	Cert. IV - Business Management
1998	University of New South Wales	MA - Cognitive Science
1996	University of New South Wales	BSc - Science and Mathematics (CS major)

Skills Matrix

Highly Proficient	HTML, CSS, AJAX, JSON, XML/XSLT, Linux, Apache, MySQL, PHP, git, bash, ssh, cron, Photoshop/GIMP
Competent	email server/client setup, Wordpress plugins/functions/theme customisation, Javascript, jQuery, SOAP/REST/oauth, Android Studio/Java, Xcode/Objective C, SSL/RSA
Have Used	Drupal, Python, Perl, Joomla, IIS, Exchange

Experience

Zib Media / Zibit	Dec 2014 - Present
Senior Web & App Developer, IT Administrator	
Full Stack Senior Developer, working across teams in both Melbourne and Adelaide. Direct liaison with stakeholders ranging from clients to developers to service providers, to ensure smooth delivery which matches expectations as well as limitations of scope. Management of servers and databases and also the company's internal IT systems. A noteworthy eye for design and creative flair has also led to consultation on a number of projects in need of a new look or 'jazzing up' - or even a complete rebuild from the ground up. Management and development of both web and native mobile applications, including management of dev team and implementation of both internal and external REST services.	
HTML5, CSS3, JSON, Java, Objective C, Javascript, jQuery, AWS, git, Wordpress, GIMP, VPS, ssh/bash	

Mehmetech Pty Ltd	Jan 2013 - Nov 2014
Senior Developer, Webmaster, Systems Administrator, Database Manager, Lead Designer	
Lead front and back end developer, working with front end design team on eLEDGER product. Manager of both production and development servers, including database design, security and administration of internal/external access - including management of customer data, the billing and payments system, as well as email and cloud-based collaboration tools. Management of Sales and Support enquiries, including maintenance of customer self-help knowledgebase and associated tutorial system. Most recently expanded into mobile app development using both Apple and Android IDEs to bring fully integrated products into both iTunes and Google Play app stores, complementing the existing mobile device integration of the web UI.	
HTML5, CSS3, AJAX, JSON, Java, Javascript, LAMP stack, SSL, bash, ssh, cron, mailer daemon, PEAR/Imagemagick/fPDF, oauth implementation of Google Outlook/Exchange Yahoo APIs, Xcode, Android Studio, git, Wordpress, GIMP, Libre Office	
Mic Mehmet Computer Services Pty Ltd	Feb 2009 - Jan 2014
PHP Developer, Systems Administrator, I.T. Consultant	
Systems design and troubleshooting for SME customers, with particular emphasis on (front end) multi-platform compatibility and accessibility, as well as (back end) process work flow. Working at times as part of dev team and sometimes solo.	
HTML4, CSS3, AJAX, XML, SOAP, JSON, Javascript, LAMP stack, IIS, SSL, bash, ssh, Photoshop/GIMP, MS Office, Exchange, Zend, Codeigniter, git, cpanel	
Staging Connections Pty Ltd	Aug 2004 - Nov 2008
Project Manager, Systems Administrator, Tech Support	
Lead dev and sysadmin on back end inventory management tool, introducing what we would now call 'cloud services' into the IT end of operations management. Staff training and change management to new system, including ongoing support and development. (NB this project was 2008 only)	
HTML, AJAX, XML, Perl, Javascript, Linux server administration, Apache, some weird DOS based legacy database system	
freelance/contract	Feb 2000 - Aug 2004
Lead Developer, Web Developer, Web Designer, Developer	
Various short and long term contracts for customers including the London Borough of Haringey, Medibank Private, and Showeb - producing work ranging from front end design and implementation to back end database migration and even developing bespoke in-house solutions for back end systems integration.	
HTML, CSS, XML, PHP, Javascript, Linux, Exchange, MySQL, MSSQL, Apache, cpanel, MS Office, Photoshop, OSX	
Intenia	Jan 1998 - Feb 2000
Software Engineer, Operator	
Working across Operations and Application Engineering (programming) on various projects for mostly large corporate clients like Pizza Hut, Avon, EDS and CBA, primarily working with proprietary ERP technology for the IBM AS-400 mainframe platform but also other platforms like Windows NT and Solaris.	
RPG, SQL, Java, AS-400, NT, Solaris
